

# The burning question about cold storage

Westgate, Melbourne 2001

Tegel, Christchurch 2007

Tip Top bakery, Sydney 2003

Cold storage environments –  
How can you be sure you are  
not building a toxic fire trap?

Polystyrene insulation cored  
panels melt and burn readily,  
spreading fire rapidly, releasing  
toxic black smoke.

How can you be sure you are  
not building a toxic fire trap?

By selecting Kingspan **FIREsafe**<sup>™</sup>  
PIR core cold store panels –  
the first unlimited height panels  
manufactured in Australia  
approved by Factory Mutual.

PlusOne KING140

**FIBRE**free

**FIRE**safe<sup>™</sup>

**ECO**safe
